Price:	9.722,30 € (nett:8.170,00 €)

Product description

This set of winter wheels for the Porsche 911 model 992.1, specially designed for the GT3 and GT3RS variants, offers an optimal solution for the cold season. The combination of 20-inch and 21-inch rims, with dimensions of 9J x 20 ET43 for the front axle and 11.5J x 21 ET46 for the rear axle, guarantees a perfect fit and excellent driving stability even in winter conditions.

The rims have an attractive black satin finish, which is not only aesthetically pleasing but also resistant to road salt and moisture. The central locking mechanism ensures quick and secure mounting of the wheels on the vehicle.

The wheels are fitted with high-quality Michelin Pilot Alpin 5 winter tyres, which are renowned for their excellent traction and high level of safety on snow and ice. The tyre sizes 245/35 R20 at the front and 305/30 R21 at the rear offer optimum contact area, thereby improving braking performance and handling in winter conditions.

In addition, the wheels are equipped with TPMS sensors that continuously monitor tyre pressure, thereby contributing to driving safety. The OEM number for this wheel set is 992044601CA, which confirms its authenticity and high quality as a Porsche genuine part. The product is new, which means it is a new, unused and undamaged item. This set of winter wheels is an excellent choice for drivers who do not want to compromise on the performance and safety of their Porsche 911 992.1 GT3 or GT3RS, even in the coldest months of the year.

Technical specifications

Front rims:	Article number: 9GT601025B JE1 Quantity: 2 Rim width: 9J Rim diameter (inch): Offset (ET):
