Discount:	20%
Available:	availability on request
Price:	4.698,11 € (nett:3.947,99 €)

Product description

This set of 21" Macan Design winter wheels is specifically designed for the Porsche Macan model 95C, enhancing both the aesthetic appeal and winter performance of the vehicle. The set includes high-gloss black rims measuring 8.5J x 21 ET27 for the front and 10.5J x 21 ET47 for the rear, perfectly complementing the dynamic styling of the Macan.

Equipped with brand new Continental winter tires, sizes 255/45 R21 at the front and 285/40 R21 at the rear, these wheels offer exceptional traction and stability in cold weather conditions, ensuring a safe and comfortable driving experience. The tires are factory-fresh, indicating zero kilometers on them, which guarantees optimal performance.

The rims come with integrated Tire Pressure Monitoring System (TPMS) sensors, which provide real-time tire pressure information, further enhancing safety and maintaining optimal tire condition.

This wheel set is an original Porsche part with the OEM number 95C044600D, ensuring perfect compatibility and performance as per Porsche's high standards. Although listed as used, the rims are in near-new condition with very low mileage and may show minimal signs of wear or storage marks, which do not detract from their quality or performance.

Ideal for Porsche Macan owners looking to equip their vehicle with reliable, stylish, and high-quality winter wheels, this set combines functionality with an elegant design, making it a superb choice for enhancing your vehicle's winter readiness and overall look.
